

Quality Engineer Tier II Automotive

We are looking for an experienced Quality Engineer for our Romeoville manufacturing facility. We will consider candidates with strong automotive background and quality engineering experience in all phases of product life cycle; solid technical experience ideally in injection molding and precision stamping are preferred and proficiency in metrology is expected.

Scope of Duties:

- Supervises product quality for assigned products/projects throughout product life cycle (project phase, regular serial type production, post serial type production).
- Leads part approval process internally as well towards assigned customers and suppliers; prepares and updates related documentation including flow charts, control plan, FMEA, MSA, dimensioning report, SPC.
- Plans and develops standards and methods for inspection, testing, and evaluation; evaluates feasibility on customer requests.
- Handles quality claims (customer, internal, supplier); manages root cause analysis and corrective actions; updates related documents including FMEA.
- Assists with the implementation of new or changed customer requirements; monitors compliance of existing and new customer requirements.

Requirements:

- Degree in either plastics, mechatronics, industrial engineering or equivalent on the job experience.
- ASQ and Internal Auditor Certification preferred.
- Ability to lead/guide teams and facilitate for successful completion of projects.
- Experience with automotive quality core tools (APQP, PPAP, MSA, SPC, FMEA) required.
- Strong data analysis, interpretation and presentation skills.
- Experience with plastic injection molding and stamping processes preferred.
- Proficient with metrology and measurement tools and techniques including GD&T.
- Experience in handling and negotiating quality agreements.

Insofar as personal names are given only in masculine form, this applies equally to women and men.
